

# DS7428-CHI MUX Bus Extender Module

www.boschsecurity.com

**BOSCH**  
Invented for life

- ▶ One-loop input
- ▶ Two-loop output
- ▶ Two-wire multiplex bus
- ▶ Extends MUX distance up to 5 km

The DS7428-CHI is a one-loop input and two-loop output Multiplex Bus Extender Module for use with the DS7000 Line. It connects directly to DS7430 or DS7436 and provides each multiplex bus loop to a maximum of 5 km.

## Ordering information

**DS7428-CHI MUX Bus Extender Module**  
Order number **DS7428-CHI**

## Installation/configuration notes

### Compatibility

Modules:	DS7430, DS7432, DS7432E, DS7436, DS7447i, DS7457i, DS7457iE, DS7457iF, DS7460, DS7460i, DS7465, DS7465i
Control Panels:	DS3MX Series Three-zone Mini Control Panels, DS6MX Series Six-zone Control Panels, DS7400Xi Series Addressable Control Panels

## Technical specifications

### Electrical

Input Power:	12 VDC
Current Draw:	120 mA
